INTRODUCTION

1.1 Financial Services and Markets Act 2000

The Financial Services and Market Act 2000 ("the Act") came into force on 1 December 2001. This brought the regulation of most financial services companies into the remit of the Financial Services Authority. From this date it has been a criminal offence to provide financial (other than credit) services without authorisation (or exemption) under the Act.

1.2 The FSA Register

The online FSA Register is a public record of financial services firms, individuals and other bodies which fall under its jurisdiction.

The online FSA Register provides an online search for firms that are or have been regulated by the FSA under the Financial Services & Markets Act 2000 (FSMA), which came into force on 1 December 2001. If you require regulatory information prior to this date please [contact us](#).

The online FSA Register also allows users to search for businesses that are or have been registered with the FSA under the Money Laundering Regulations and the Payment Services Regulations. For information about subscribing to a separate extract for the Payment Services firms, please contact email: data.extract@fsa.gov.uk

Access to the Register is free via the Internet (www.fsa.gov.uk/register) which is suitable for ad hoc searches for authorised and registered firms and individuals.

1.3 Register Extract Service

The Register Extract Service forms part of the FSA's Publication Scheme which has been compiled in line with our obligation under the Freedom of Information Act 2000.

The FSA Register Extract Service offers a subscription service (weekly or monthly updates) and a single, one-off, copy of the data. The service is made up of two data extracts: the 'firms extract' and the 'individuals extract'. The standard service includes only the firms extract. For an additional fee, the service can be enhanced to include the individuals extract. The individuals extract is not sold on its own. Please note that the Register Extract Service does not include data we show on our Register for Money Laundering Regulations. More information on the Money Laundering Regulations can be found under Appendix E (G4) of this handbook. The data can be provided in a number of formats and different media (see sections 3.1 and 3.2 below).

Alternative provision of the FSA register extract and related services is available from Spectrum Data Management Limited (SDM). SDM provides an internet based register extract download and interrogation facilities for the data. Full details of their service are obtainable via SDM's website (www.sdm.co.uk) or you can contact SDM at:

Spectrum Data Management Limited

69 Monmouth Street
London
WC2H 9JW

Contacts:
Paul Robinson: 020 7107 9830

An annual licence fee is payable to FSA for the use of the register data supplied via SDM. The charge for the services provided by SDM is paid direct to them as this service does not form part of the FSA service to you.

1.4 Subscribers Handbook

This handbook explains the administration of the extract subscription service, together with some background to the actual Register administration; and provides full details of the FSMA firms extract: format and codes used. Subscribers will be notified of updates to this handbook. Revised versions will be issued to subscribers when there have been substantial changes. Subscribers can request an up-to-date copy of the handbook at any time (we will usually send this via email).

ADMINISTRATION

2.1 Extract Delivery

On receipt of your initial subscription payment, you will be included on the distribution list for the next extract production date which will depend on whether you are a monthly or weekly subscriber. Weekly extracts should reach you on Tuesday mornings. Monthly extracts should reach you on the first Tuesday of each month. Overseas addresses should receive extracts by the Wednesday. Allowances should be made for public holidays. No extracts are produced for delivery on the Tuesday following Christmas.

EXTRACT MEDIA IS NON-RETURNABLE.

2.2 Help Lines

For enquiries regarding the contents of the extract, or subscription details, you should contact:-

Johnathan Ramsell
FSA Register – Systems and Operations Management
Financial Services Authority
25 The North Colonnade
Canary Wharf
London E14 5HS

Direct Line: 020 7066 7490 Switchboard: 020 7066 1000

E-mail data.extract@fsa.gov.uk

Queries regarding the data of specific entries should be directed to the Register enquiry

service by telephone 0845 606 9966 or by email register@fsa.gov.uk

2.3 Subscriptions and Renewals

For new customers, the initial subscription period will vary depending on when the subscription was entered into with the FSA. The standard subscription year runs from 1 April to 31 March each year. The minimum subscription period for monthly/weekly updates will be 3 months. New subscriptions taken out in February or March will be for 14 and 13 months, respectively.

At the end of your initial subscription period you will be automatically invoiced for a further 12 month period (1 April to 31 March) at the appropriate subscription rate. For those subscribers who have provided the FSA with a Direct Debit mandate, the invoice will notify you of the date when we will make our collection and confirm the amount to be collected.

The FSA will inform subscribers of any price changes at the least 2 months in advance as set out in the Terms and Conditions of the service.

2.4 Who do I contact if I have a complaint?

If you are unhappy about the level of service we are providing under the Terms and Conditions of this service, please call a member of the FSA Register Team: Lara McSweeney (020 7066 3678) or Chris Stoddart (020 7066 0208).

However, if you want to make a formal complaint, please write to or email Chris Stoddart, the FSA Register Manager. Emails should be sent to data.extract@fsa.gov.uk. For more information about making a complaint to the FSA please visit the FSA's website (<http://www.fsa.gov.uk/Pages/About/complaints>).

EXTRACT FORMAT

3.1 Magnetic Tape Format

The extract is available in three basic tape formats. The first, aimed at IBM systems, provides fixed length fields and fixed length records, EBCDIC coded with standard IBM labels on 3480 cartridge. Other formats provide variable length fields and records (field separator = |), ASCII coded files. They can be provided as standard files or Unix TAR files on 4mm DAT tape or 8mm EXABYTE tape.

3.2 Other Media Format

The variable length records can also be provided on standard CD (CD-R) or compressed onto multiple 3½" floppy discs.

3.3 Extract Contents

The firms extract contains five files:

1. Authorisation File in FSA Reference Number order
2. Permitted Activity File FSA Reference Number order
3. Alternative Name file in FSA Reference Number order
4. Appointments file in FSA Reference Number order
5. Products File in FSA Reference Number order

The individuals extract contains three files:

1. Individuals File in FSA Individual Reference Number order
2. Controlled Function File in FSA Individual Reference Number order
3. Appointment Employment file in FSA Individual Reference Number order

Detailed File Layouts for the extract are contained in Appendix A. Not all fields are mandatory. Fields such as Telephone Number and Postcode may not contain data.

3.4 Authorisation File

This file contains the Name, Address and current Status of firms on the Register. Dates of first Authorisation and of Current Status are also included. A Sort Key based on the name, with all spaces and punctuation removed, is included to aid name searching. Values used in the Status field are in Appendix C (including an explanation of their meaning). The file will always contain entries of firms that have ceased to be authorised. If media capacity becomes a problem the records may be removed from the extract any time later than one year after authorisation has ceased. It is important to check the status to confirm authorisation. This file also includes the basic details of all appointed representative firms (status=Registered). Details of their current appointments (if any) will be in the appointments file. Only firms that have been subject to regulation under the Act will be included in the file.

3.5 Permitted Activity File

This file contains the regulated activities (e.g. the type of financial services) which authorised firms on the Authorisation File are permitted to provide. This file should be used in conjunction with the Authorisation File, using the FSA Reference as the key. Each entry has a status and a status date. These records will remain on the system for about six months after they cease to be current.

3.6 Alternative Name File

This file contains other names that a firm on the authorisation file is known to use or has used in the past. It is not necessarily the case that all historical data is present.

3.7 Products File

This file contains details of the Collective Investment Schemes that are regulated by FSA

3.8 Appointments File

This file provides the link between an appointed representative record (in the authorisations file) and its principal firm(s) (also in the authorisations file).

3.9 Sub Status Code File (Available from November 2006)

This file shows those firms who have a current sub status code

3.10 Individuals File

This file provides details of all persons approved to undertake a controlled function for an authorised firm. These are mainly individuals but in rare cases can be corporate persons.

3.11 Individuals Controlled Functions File

This file contains details of all controlled functions currently held, or that have been held, by approved persons since 1 December 2001. The approved date in this file is the date that the FSA approved the controlled function for the individual.

3.12 Individual Employment Details File

This file provides details of any employment links with appointed representative firms through which an individual has undertaken a controlled function.

3.13 Update Details

Each copy of the Register that you will receive will be a complete copy. To recognise what details have changed since you last received a copy, a comparison of the data sets is required. Changes are not normally backdated but may be in exceptional cases. In addition, normal operations mean that updates to the Register may occur a short while after the relevant FSA authorisation committees meet. Extracts produced within this time lapse will give the effect of backdated updates. To overcome these data characteristics, it is recommended that the data from each extract is used to replace the data from the previous extract rather than being used to update the system.

As an aid to identify changes to the records on each of the files, the date that the record was last changed on the register is included and could be used to identify changes since the last extract was produced. If this technique is used, it is recommended that the data is refreshed completely (using the full extract) on a regular basis. Whilst every effort will be made to ensure that the date record will be updated whenever any data in the record is changed, it cannot be guaranteed. It is also possible for this date to be updated even if there is no data change reflected in the data in the extract.

Files will contain historic data as well as current data. Thus the status field needs to be checked to confirm the currency of the data.

REGISTER ADMINISTRATION

4.1 Updates

The FSA updates its own internal database system during its normal daily operations. These updates include changes in a firm's status (normally on the same day that they become effective) and names and address changes, the majority of which should be applied within 72 hours of the FSA being notified. The FSA Register on the Internet is rebuilt from the FSA's internal database each evening.

4.2 Extract Production

In order to allow for the production and despatch of the extracts, the data is extracted each Thursday evening. These master files, in ASCII format, are then supplied to our copy bureau for formatting and replication and are despatched by them overnight on the first working day of the following week. In normal circumstances, you should receive the data on the Tuesday morning following the extract (Wednesdays for overseas customers). For monthly customers this will be the first Tuesday of the month.

4.3 FSA Firm Reference Numbers

Each entry on the FSA internal database is allocated the next vacant number when it is added to the system. The reference numbers allocated to authorised firms are not necessarily consecutive because not all firms that apply to the FSA for authorisation complete the authorisation process.

When a firm undergoes a change of legal status, a new legal entity may be created. The new legal entity will be required to apply for a brand new authorisation and will, therefore, be allocated a new reference number. The original entity will have its authorisation cancelled. This is not required for firms that change legal status from Limited to PLC, or vice versa and for some changes to Partnerships, provided that the entity does not change. The policy of some previous regulators, whereby an organisation had a one-to-one relationship with its firm reference number, no longer applies. Previously, an organisation would retain the same number irrespective of whether it moved, changed its name, moved regulator, became incorporated or returned to being authorised following a non-authorisation period.

4.4 FSA Individual References

Each entry on the FSA internal database is allocated a unique reference. The reference is unique for an individual and should be retained by that individual throughout their regulated career.

4.5 Deletion of Records

The Act allows FSA to remove records from the Register when it considers fit. This has generally been defined as six years after the entry became no longer authorised. This rule is changed at FSA's discretion. Currently, the only circumstances causing records to be deleted is where the record has appeared in error. Whilst the records will not normally be deleted from the Register, the FSA may remove them from the extract files, if file sizes become excessive. This will not be less than one year after the entry has ceased to be authorised.

This Page Left Blank

APPENDICES

A MAGNETIC TAPE FILES STRUCTURE

The data is available in two basic formats. EBCDIC coded data in fixed length records with no record separators and ASCII data with variable length fields and field and record separators. The separators are the split vertical bar (ASCII code 124) for field separators and the standard carriage return and line feed combination (code 013/010) for record separators.

The standard extract will contain the following files:

- Authorisation File in FSA Reference Number order. Contains around 24,500 authorised firm's records plus 30,000 appointed reps (including introducers).
- Permissions File in Activity order within FSA Reference Number order. Around 1,070,000 records. Ended Activities are retained in file for six months.
- Products File in FSA Reference Number order. Around 2,000 schemes.
- Alternative Name files in FSA Reference Number order. Over 33,000 names.
- Appointments file in FSA Reference Number order. Approximately 64,000 relationships.
- Sub Status Codes in FSA Reference Number Order

The enhanced extract, including data on approved individuals, adds three further files:

- Individuals File in FSA Individual Reference Number order. Contains around basic details of around 165,000 approved persons. These may be corporate persons in rare cases.
- Controlled Functions File in FSA Individual Reference Number order. Around 675,000 controlled function involvements for individuals in relation to authorised firms.
- Employment details File in FSA Individual Reference Number order. Around 50,000 employment involvements for individuals in relation to appointed representative firms.

The EBCDIC files have fixed length record and fixed length blocks. The sizes are:

File	Record Size	EBCDIC Tapes	
		Block Size	Records Per Block
Authorisation	745	32035	43
Permissions	72	32760	455
Alt. Name	294	32634	111

PARTNERSHIP	PLC	LIMITED	OF	PARTNERS
SOCIETY	SON			

B RELATIONSHIP MAP

C CODE VALUES

Each of the files has a number of 'codes' in each record. The following tables give the possible values of these codes and where appropriate, an explanation of these values.

C.1 FIRMS FILE

C.1.1 Firm Legal Status Type

<u>Tape Code</u>	<u>Description</u>
1	Company Limited by Share Capital
2	UK Co Incorporated by Special Act/Royal Charter
3	Sole Trader
4	PLC
5	Limited
6	Incorporated under Industrial and Provident Act 1965
7	Not Migrated
8	Not Supplied
11	Company Limited by Guarantee with Share Capital
12	Company Limited by Guarantee with No Share Capital
14	UK body created by Special Act/Royal Charter
21	Unincorporated Body
22	Trust
23	Partnership
24	Limited Partnership
29	Not Yet Formed
30	Private Unlimited Company
32	Multi National Entity via Tin Marketing Board
34	Municipality or State e.g. New South Wales
42	Limited Liability Partnership
43	Registered under Industrial & Provident Society Act 1965 and Credit Union Act 1979
44	Incorporated under the Building Societies Act 1986
45	Incorporated under the Friendly Societies Act 1992
46	Registered under the Friendly Societies Act 1974
47	Registered as overseas company by Companies House
48	European Public Limited Liability Company (SE)
49	Registered – Other Company Type by Companies House
50	Overseas firm incorporated
51	Overseas firm unincorporated

C.1.2 Firm Type

<u>Tape Code</u>	<u>Description</u>
1	Regulated
2	Branch (UK) of a Overseas Firm
5	Services (UK) of an Overseas Firm
6	Appointed Representative
27	Introducer Appointed Rep
29	Tied Agent (W.E.F 01/11/07)

C.1.3 Current Authorisation Status

<u>Tape Value</u>	<u>Description</u>
Authorised	Firm with an authorised Part IV Permission
Registered	Firm which we hold details about but which do not have a Part IV Permission - mainly appointed reps or former appointed reps
EEA Authorised	Firm authorised by an EEA regulator and passporting into the UK under one of the following directives: BCD, ISD, 3LD, 3NLD, IMD, UCITSMD
Suspended	Firm whose Permission has not been cancelled, but which needs to suspend certain or all activities for a period of time (N.B. this status is being phased out)
Resigned	Replaced by cancelled - see cancelled for definition.
Cancelled	Firm which has had its Part IV Permission cancelled through the normal resignation process.
Revoked	Firm which has had its Part IV Permission cancelled through disciplinary action by the FSA.

C.2 ALTERNATIVE NAME FILE

C.2.1 Alternative Name Type

<u>Tape Code</u>	<u>Description</u>
1	Registered Name
2	Trading Name
3	Common Name

C.3 PRODUCT AUTHORISATION FILE

C.3.1 Product Legal Form

Authorised Unit Trust
Offshore OEIC
SICAV
Offshore Unit Trust
FCP
ICVC
Not Supplied

C.3.2 Current Product Status

D DATA INTERPRETATION

D.1 Introduction

There are basically three sets of data contained in the eight data files. Four files hold information about authorised firms and appointed rep firms, both current and previous. One file contains details of collective investment schemes, both those UK authorised schemes and overseas schemes recognised in the UK. The final three (optional) files provide details of approved individuals. These are again linked to the authorised firms that sponsor them and the appointed representative firm (if any) that they work through. Each of the eight files has a header giving the time and date that the data was extracted from the FSA's internal database. Every record has a field giving the latest date that any data within that record may have been amended.

D.2 Firms

The details for firms are contained in four files, related by the FSA firm's reference number. This number is defined as a seven digit number that is issued sequentially to firms as they are added to the FSA database (not all appear on the Register). The current numbers are six digits only (seven, with a leading zero in fixed record length file format) it is likely to be several years before seven digit numbers are used, but any new systems should allow for seven digit numbers.

The Basic Details file:

This gives the firms current name and principal address (if the firm is no longer regulated this is the name and address it had when it ceased to be regulated), its regulatory status and date this was attained and other basic firm information. Two types of firm are in the file, firms deemed to be authorised (either currently or previously) and appointed representatives (AR). ARs always have a status of Registered and a business type of 'Appointed Representative' or 'Introducer'. This remains the case when it ceases to be a representative. It is essential to check that an AR has a current appointment, i.e. an appointment record with a status of notified or registered.

Each authorised firm will normally have one or more records in the permissions file.

The Permissions file:

This defines the type of activity that the firm has been approved to undertake. Where a firm has changed their main name the old name will be in the names file, as will any trading names that FSA is aware of.

Appointments file:

The appointments file gives the current appointment involvement. It shows the status between an authorised firm and its appointed representatives. Three status values are used: 'Notified' is used for those appointments which have not been modified since N2, 'Registered' is used for those involvements that have been added or amended since N2 and 'Withdrawn' is used for those involvements that are no longer current.

Sub Status Code file:

This file will show those Authorised firms who have a current sub status code. A sub status will give more information on the status of an authorised firm. For example, a firm who has a status of "Authorised", may have a sub status of "In Administration". There are 5 sub status descriptions and these can be found under C.6.1

D.3 Individuals

The individual details are held in three files, each with their own unique individual reference number (IRN). The IRN consists of three letters followed by five digits. The three files are as follows:

Individual Basic Details file:

The basic details file provides the individuals names (title, forename and family name), a sort-code (family name, forename and no spaces). There are two fields, one for date of birth and the other for an individual's NI number, which will remain blank for data protection reasons. This file also provides the individuals current status, active (has current controlled functions) or inactive (no current controlled functions).

Individual Controlled Function Details file:

All controlled functions are approved to the regulated firm including those under Appointed Representative (AR) arrangements.

It is possible for Authorised Firms not to have any active approved persons. For example, sole traders authorised to carry on mortgage and/or general insurance intermediary activities will not necessarily have controlled functions. This may also occur in the period before a firm's authorisation is cancelled and can occasionally occur at other times for various reasons.

Individual Employment Details file:

Where an individual performs one or more controlled functions under an AR arrangement, there will also be an entry in the employment file, showing a link between individual and AR firm.

Introducer ARs should not have an employment link as this type of representative does not require approved persons.

E PERMISSIONS**E.1 Introduction**

From 1 December 2001 (N2) most financial services activities within the UK became regulated by the FSA under the Act, this included those firms that were previously regulated by the PIA, SFA, IMRO, BSC, RFC, HM Treasury (Insurance Directorate), FSA (under the Financial Services Act 1986 and Banking Act), recognised professional bodies and the Society of Lloyds. Each of these firms was granted a 'Part IV' permission. This permission covers the authorisation to undertake one or more regulated activities. Each activity is restricted in three ways. The activity is approved for a specific customer type and for specific types of investments/products. The third type of restriction allows for any specific limitation to be applied. Similarly, a requirement can be placed on the firm's permission as a whole. Currently, the extract does not include details of any Requirement or Limitation (R&L) except for a basic flag indicating whether the firm has authority to hold client money.

The transitional arrangements in the Act meant that any firm authorised under any of the existing legislation prior to N2 would be authorised to undertake precisely the same business after N2 that it was authorised to perform before N2. In general, the current permissions did not match the previous activities very closely. Therefore, firms may have a set of permitted activities which would allow greater scope than before N2 with a limitation on the activity to narrow its scope back to the pre-N2 activity.

Firms that belonged to a recognised professional body (RPB) were given the option to become regulated by the FSA for their investment business. Those professional firms that decided to opt out of the FSA's supervision are still permitted to undertake limited investment business as exempt professional firms (see section 327 of the Act). As they did not opt in for FSA supervision they will not be found on the FSA register. Those that did opt for FSA regulation will have a normal permission although most have a requirement that investment business is incidental to their main professional practice (as it was under the old regime).

The Internet Register has a (separate) register of exempt professional firms (such as solicitors and accountants) that are allowed to undertake some regulated activities as incidental services in addition to their normal professional services. There are no plans to publish this data as part of the extract files.

E.2 Structure of Data

Firms are authorised for specific activities and within each activity they are authorised to deal with various customer types and various investment types. Within any activity the customer and investments may vary. Therefore the date that an activity became authorised could be different to that for a particular customer or investment type. Indeed the status may be different. For this reason there will be several records for each activity. There will be one record specifically for the activity, giving its status and status date. There will be further records for each customer type in relation to that activity giving the status and status date for that 'channel' and further records for each investment type within the activity. There is no correlation between investment type and customer type. All authorised investment types can be handled with all authorised customer types within the same activity.

E.3 Interpretation of Data

The activities are defined in the Regulated Activities Order (statutory Instrument 2001 no. 544 and subsequent amendments). Further explanations and interpretations are available in the FSA Handbook (Authorisation Module and the Supervision Manual, Chapter 10 for approved persons controlled functions), the latest version of which is available on the FSA website (www.fsa.gov.uk).

F Data Usage & Pricing Bands

The cost of subscribing to the Register Extract data will depend on how you will be using our data and how frequent you want to receive updates (Monthly or Weekly), or if you require a single one-off copy. Below is a description of the different data usage categories.

F.1 Compliance Purposes

This band will be relevant to subscribers who want to use the data for compliance purposes in terms of their firm's FSA regulated activities. This band excludes firms who provide compliance services for other firms. It does not, however, preclude firms from using the data for other purposes, provided the use does not fall within the Commercial re-use band (see below).

F.2 Other Own Business

This band will be relevant to subscribers who want to use the data for other activities, other than 'FSA Compliance, but excluding the 'Commercial re-use' purpose below. We envisage uses within this category to include (but not exclusively) marketing exercises, firms who provide compliance services to other firms or who use the information in other ways in the course of their normal business activities (other than where the data is sold by itself or as part of a product or service offered by that firm).

F.3 Commercial Re-Use

This band will typically apply to subscribers who want to sell the data by itself or as part of a product or service offered by that firm.

Prices

Please refer to the Register Extract Order Form for a list of the subscription prices.

Updates

G1: CF7. Following on from Consultation Paper 06/15 and the FSA Policy Statement PS07/03 of January 2007, the Controlled Function CF7 Sole Trader, will cease to be applied as of 1st February 2007. Firms will therefore no longer be required to submit an application for individuals to be approved for this function or to seek a withdrawal of this function after the 1st February 2007. The records of those individuals currently holding the CF7 Sole Trader function will be amended by the FSA throughout February 2007. The status of the function will be changed to show "withdrawn" with an end date of 31st January 2007 and all amendments will be visible on the FSA Register by the end of February 2007.

G2: SIPPS, Home Reversions and Home Purchase Plans. The regulation of Self Invested Personal Pension Schemes (SIPPS), Home Reversion Plans and Home Purchase Plans comes into form on 6 April 2007. The appropriate codes have been added to this handbook. For more information about the regulation of SIPPS, Home Reversions and Islamic law-compliant Home Purchase Plans, please see the relevant Policy Statements:

The regulation of personal pension schemes including SIPPS – Policy Statement (PS06/07)
Regulation of Home Reversion and Home Purchase Plans (Part 1) – Policy Statement (PS06/12)
Regulation of Home Reversion and Home Purchase Plans (Part 2) – Policy Statement (PS06/12)

G3: MiFID (Markets in Financial Instruments Directive). The Markets in Financial Instruments Directive (MiFID) comes into effect on 1 November 2007, when it will replace the existing Investment Services Directive (ISD). The implementation of MiFID will introduce a number of changes to the data that you receive from us via the Register Extract Service (RES). At the same time, the FSA is planning to introduce some changes to the Approved Person regime which will also have an impact on the RES. There will be no changes to the existing structure of the data files.

For more information about the implementation of MiFID, please refer to the FSA's MiFID Permissions and Notifications Guide:

http://www.fsa.gov.uk/pubs/international/mifid_guide.pdf

What is changing in the Register Extract as a result of MiFID?

Regulated activities (regulated activities)

MiFID introduces a new regulated activity of 'operating a multilateral trading facility'. We will be adding this new regulated activity to the RES files.

Firms that are currently authorised to operate an alternative trading system will be automatically authorised to carry on the new regulated activity of operating a multilateral trading facility. This will be evident from the extract as the regulated activity of operating an alternative trading system in the Firm Permission File will have a status of 'converted'.

Client Categorisation (customer types)

MiFID introduces new categories of client: retail client, professional client and eligible counterparty. We will be adding these as new customer types in the RES files.

In most cases, the FSA will automatically map firms' existing customer types to the new MiFID-

based client categories. This will be evident from the extract as the old customer type record in the Firm Permission File will have a status of 'converted'.

Passporting (regulated activities and investment types)

The MiFID passporting regime will apply to a broader range of activities, services and financial instruments than the current ISD passporting regime. The new MiFID passports will be added to the RES files in the same way as other passports, by including them as regulated activities (with the relevant financial instruments shown as investment types).

In most cases, the FSA will automatically map firms' ISD passports to the corresponding MiFID equivalent. This will be evident from the extract as the old regulated activity in the Firm Permission File will have a status of 'converted'.

Tied Agents

In the UK, we currently have an appointed representative regime and details about appointed representatives are already provided in the RES files. MiFID introduces a broadly similar regime for tied agents. The UK will operate the MiFID tied agent regime alongside the existing appointed representative regime.

There will be no change to the way appointed representatives are shown in the Firm Authorisation file of the RES. Where an appointed representative is carrying out MiFID business in the UK, the RES will also identify it as a (MiFID) tied agent. Tied agents will be recorded in the Firm Permission file with a pseudo regulated activity (in the same way that appointed representatives who undertake insurance mediation business are identified with a pseudo regulated activity - code 1001).

Where a UK firm uses tied agents established in other European Economic Area (EEA) Member States for the purposes of MiFID, the tied agent will appear as a separate entry in the Firm Authorisation file of the RES. A new Firm Type code will be introduced to identify these EEA Tied Agents. There will also be a corresponding entry in the Appointments File (as with appointed representatives) to link the tied agent to its UK principal firm(s).

What is changing in the Register Extract as a result of reforms to the FSA's Approved Person regime?

In terms of the RES, the changes to the Approved Person regime from 1 November 2007 will lead to the merging of the current:

- systems and controls controlled functions (CF13 to CF15) into one (new) generic function (CF28);
- significant management controlled functions (CF16 to CF20) into one (new) generic function (CF29); and
- customer controlled functions (CF21 to CF27) into one (new) generic function (CF30).

We will be adding these three new controlled functions (CF28 to CF30) to the RES files and the old CF codes will be end dated.

For more information about the changes to the Approved Person regime, please refer to the following FSA publications:

CP06/15: Reforming the Approved Persons Regime

PS07/4: Reforming the Approved Persons regime – Feedback on CP06/15 (Merging the Customer Functions) and final rules

http://www.fsa.gov.uk/Pages/Library/Policy/Policy/2007/07_04.shtml

G4: 3MLD – 3rd Money Laundering Directive

The Regulations, which came into effect on 15 December 2007, will implement the requirements of the European Union's Third Money Laundering Directive ('3MLD') in the UK. Information about how the FSA is implementing the Regulations can be found on the [FSA's website](#). You should note that these Regulations will not affect or be incorporated into the Register Extract Data files.

G5: Additional Sub Status Codes

We will be adding 2 new 'sub status' codes to the existing sub status file firm_sub_statusyyyymmdd (file z). the new codes are as follows and will come into effect from 1st May 2008:

Tape code: 9

Description: 'applied to change legal status'

Tape code: 10

Description: 'applied to change business type'

G6: Unclaimed Assets

Following on from a Labour Party 2005 Manifesto commitment, the Treasury is setting up a scheme to reinvest dormant bank and building society accounts in good causes. Banks and building societies can transfer dormant account funds, and the liability to repay customers, to a new type of firm defined in legislation as a 'reclaim fund'. Reclaim funds will have to retain sufficient money to repay any depositors who reclaim their dormant deposits, and are obliged to transfer any surplus to the Government's 'Big Lottery Fund', for distribution for 'social or environmental' purposes. The Treasury has introduced two new regulated activities which would apply to a reclaim fund:

- meeting of repayment claims by a reclaim fund;
- managing dormant account funds (including the investment of such funds)

This means that a reclaim fund will need to be authorised and regulated by the FSA. Our expectation is that the number of reclaim funds set up will be very low. Firms who wish to set up a reclaim fund are able to apply as of 6 August 2009 for permission to conduct the new regulated activities.

Tape code: 155

Description: 'The meeting of repayment claims by a reclaim fund'

Tape code: 156

Description: 'Management of dormant account funds'

G7: Payment Services Directive

The Payment Services Directive (PSD) comes into effect on 1 November 2009

On 13 November 2007 the European Parliament & Council adopted the Payment Services Directive (PSD) with the aim of achieving a single market in Retail Payment Services. The Directive was published in the Official Journal on 5 December 2007. The core objective is to enhance competition, efficiency and innovation in the European payments markets, balanced with ensuring customer protection.

Alongside Credit Institutions and e-money issuers, the PSD will require EU member states to ensure that the relevant Competent Authorities in each Member State authorise and supervise a new category of service provider, referred to as "Payment Institutions".

The implementation of the PSD will lead to the authorisation and registration of a range of firms that are not currently regulated by the FSA including:

- Money Transfer Operators;
- Mobile Phone Operators;
- Non-Credit or e-money institution credit card issuers; and
- Some Bill Payment Service Providers.

For more information on PSD please refer to: <http://www.fsa.gov.uk/paymentservices>

If you are interested in subscribing to the PSD data, please contact data.extract@fsa.gov.uk

G8: Alternative Debentures – New Investment Type Code

The government has introduced legislative changes to create a new investment type for these instruments to ensure they are regulated in a similar manner to conventional bonds or debentures. The FSA Handbook Instrument comes into force on 26 February, 2010.

What firms will be affected?

This will affect firms carrying out a designated investment business and/or managing, arranging, dealing, advising in relation to alternative finance investment bonds. We expect commercial and investment banks from the Middle East and East Asia with branches in London, UK based Islamic banks, large investment banks to apply for the new permissions, there may be a handful of small fund managers and boutique investment banks that may also decide to apply.

For more information please see: http://www.hm-treasury.gov.uk/d/consult_sukuk141009.pdf

Please note: there will be no changes to the existing structure of the data files. The changes relate to a new code value only.

Tape code: 88

Category of Investment: Security

Investment Description: Alternative Debenture
